DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

An anticipation under 35 U.S.C. 102(b) or 102(e) is established when a single prior art reference discloses, either expressly or under principles of inherency, each and every element of a claimed invention. See *RCA Corp. v. Applied Digital Data Systems, Inc.*, 730 F.2d 1440, 221 USPQ 385 (Fed. Cir. 1984).

It is well settled that the law of anticipation does not require that the reference teach what appellant is teaching or has disclosed, but only that the claims on appeal "read on" something disclosed in the reference, i.e., all limitations of the claims are found in the reference. See *Kalman v. Kimberly Clark Corp.*, 713 F.2d 760, 218 USPQ 781 (Fed. Cir. 1083). Moreover, it is

not necessary for the applied reference to expressly disclose or describe a particular element or limitation of a rejected claim word for word as in the rejected claim so long as the reference inherently discloses that element or limitation. See, for example, *Standard Havens Products Inc. v. Gencor Industries Inc.*, 953 F.2d 1360, 21 USPQ2d 1321 (Fed. Cir. 1991).

2. Claims 21-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Rostoker (5,662,768).

Rostoker (5,662,768) discloses an IC having at least one trench capacitor, wherein the capacitor comprises:

As to claim 21: an opening having vertical sides with a plurality of lateral openings 16, 31, an insulator 30, lining said opening, a conductor 32, filling the opening. See figures 1-1-4, columns 1-11.

As to claims 22-24: lateral openings comprise a rectangular, circular, v-shaped opening in cross section.

As to claims 25-26: the lateral openings are inherently increased the surface area of the trench capacitor, hence increasing the capacitance.

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

2. Oehrlein et al. (5,155,657) and Lur et al. (5,449,630) each disclose a trench capacitor with lateral openings. See entire documents.
